

# Wi-Fire

Reliable Wireless Connectivity for Mac

MSRP US \$49

SPECIAL MUG PRICE \$39.20

## The Ideal High-performance WiFi Adapter for Your Mac

If your Hot Spot is really more tepid, you're sick of pulling your hair out over dropped, weak or slow signals or you are traveling but want to stay in touch and online; the Wi-Fire is the ideal accessory for your Mac!

Wi-Fire is a fully integrated adapter that provides access to a wireless connection from up to 1,000 feet. A perfect product for your on-the-go lifestyle.

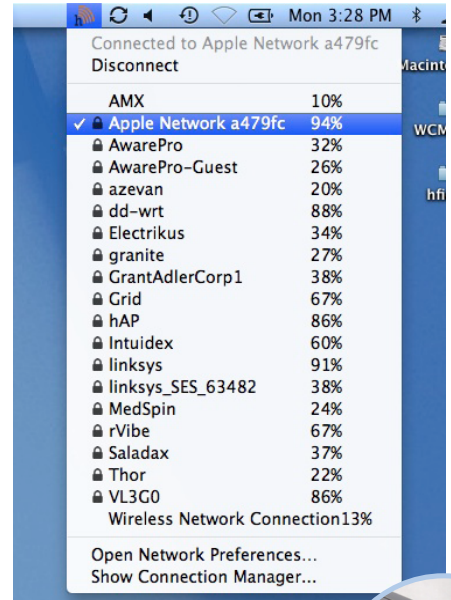

With the Wi-Fire plugged into your Mac, you'll find more wireless networks and stronger signals. You can share photos... stream videos...surf your favorite Web sites...play online games...send e-mail...or even plan your next vacation. With the Wi-Fire, convenient high speed and long range wireless connectivity is as easy as plugging the Wi-Fire in and a few clicks. You can connect wirelessly with the feel and simplicity Mac users expect and have grown to love. Connect as easily as with AirPort, but from further away and with more reliable faster connections.

## WiFi Connectivity With The Simplicity Of Use Mac Users Expect

hField's Wi-Fire Connection Manager 2.0 was built from the ground up by experienced Mac software developers to make connecting with your Wi-Fire as easy as possible. Connecting to your Wi-Fi network with the Wi-Fire is as easy as connecting to a network using AirPort, but with additional information available if you need it. Wi-Fire Connection Manager is finely tuned and ready to give you all the details on networks in the area.

## Simply The Best Performing Wifi Adapter On The Market

And with the Wi-Fire, you'll see more networks in your area than you ever knew existed. In a recent MacObserver review of the Wi-Fire, they found 39 WiFi networks with Wi-Fire while AirPort found only 14. Wi-Fire, which works on Windows and Linux as well as Mac, simply offers better WiFi connectivity than any other product on the market. After extensive testing, Maximum PC magazine concluded that Wi-Fire, "Delivered unbelievable range. Best throughput at range, bar none," and Engadget declared that Wi-Fire is "Worth Every Penny." hField is happy to bring the Wi-Fire to more Mac users and offer even more value for your buck through a special Mac User Group price of \$39.20. Contact your local MUG for details.

You can connect to any available Wi-Fi network with the Wi-Fire as simply as you can with AirPort. The only difference is that the Wi-Fire delivers faster and more reliable connections to more networks from a greater distance. If you need more details, just click "Show Connection Manager..."

“If you're into Wi-Fi, you're going to love the Wi-Fire. [We] were pretty much blown away by its performance.”  
—Macenstein

“...A must-have accessory for anyone that needs to make the most of their WiFi connection.”  
—John Braun, MacObserver
